Specifications

Working Voltage	7.4V	Watt loss	10w
Average Life time	30000 h	Cooling mode	Heat sinks, natural ventilation
Illuminance (LX)	500	Color temperature (K)	5800K/3000K
Color rendering	≥80%	Illumination angle	80°
Soft mode	Soft-film standard	color temperature Transform	3000k standard filter
Box volume	230 x 147 x 97mm	Packing Piece	30 PCS

Color temperature adjustment filter (option)

Amber film 3000K Amber film 4000K Red(R) Green(G)

Bule(B) Yellow (Y) Magenta (M) Cyan(C)

Standard Package contains:

1. R-3 LED lamp holder one Piece (Including Amber film 3000K one piece, Soft-film one piece, barn door two piece).
2. NP-F550 battery one piece.
3. NP-F550 battery charger one piece.
4. 1/4 double-spigot screw adapter one piece
5. Instruction manual.

Design and specifications subject to change without notice.

A Photography lights will be installed in the camera or photographic camera lights before removed, is required to set the power switch in OFF.

Parts diagram

1. Dimming switch
2. Mains switch on/off
3. Battery lock
4. Hot shoes fastening intortum
5. Barn door
6. Soft-film
7. Amber film

Photography lights installed

1. Rotating photographic lights, make it with the consistent direction of the camera lens
2. Photography lights interface will be inserted into the interface of the camera concave-shaped
3. Clockwise rotating locking until locked in place

Photographic lights removed

The opposite direction along the arrow anti-clockwise rotating locking to Release it
The opposite direction along pull out the photographic light, removed it

B The use for photographic light

1. To following the picture to install the battery, when heard a weak "pyridaben carbazole" sound the installation is completed.
2. When need to replace the battery push the battery lock ③in accordance with the arrow direction to promote the battery can be unloaded.
3. When you turn on the photographic light please set the power switch to "ON"
4. When you turn off the photographic light please set the photographic light to "OFF"
5. To following the picture to push dimmable ①it will be adjust the illumination scope between 20% to 100%
6. According to filming luminous efficiency need to select color temperature, Without the filter Color temperature is 5600K for daylight. Use the Amber film the luminous efficiency color temperature is 3000K.
7. Want Soft, you can use the equipment soft-film. soft-film can also working with the Amber film in the same time.

Note

1. When the electric will run out of time, power will be cut off, after few seconds it will re-open, it can still light up a few seconds, then will be cut off again. Please replace the batteries at this time, to prevent influence on use.
2. After use Please set the power switch to "OFF"
3. When not in use, please remove the battery and then bring photographic lights stored in boxes.
4. In storage before, make sure photography lights are cool.

C Lighting for photography objects

- When using this device in indoor photography, you get beautiful clear color image.
- For ultra-wide angle photography, photography light images may not be able to complete the line shine. Please effective use of photography has been light on the main photography objects on camera.
- In photography under fluorescent screen may make some shine. Light may improve the use of photographic color film of the ambiguity in order to better screen quality.
