

Dual Grip Gimbal Handle

ONE SHEET

Overview

Controlling your MS1, DS1 or EC1 Beholder Gimbal is a breeze with Ikan's DGH Dual Grip Gimbal Handle! Constructed out of durable, lightweight, aluminum, the DGH's sturdy frame is specifically designed to make gimbal operation much easier.

After mounting your MS1, DS1 or EC1 on it, two comfortable, padded grip handles allow you to control the gimbal's movement with your upper body instead of your wrist. The shift in weight greatly increases stability and decreases arm fatigue. Depending on your shooting preference, you can operate the gimbal either over-handed or under-handed once it's mounted on the DGH. The built-in tabletop feet allow you to easily calibrate your gimbal hands-free and provide a firm base to set it on when not in use.

Although the DGH is specifically designed for Ikan's MS1, DS1 and EC1, it is compatible with most gimbals that feature a 1/4"-20 mounting point on the gimbal's base.

DGH | Dual Grip Gimbal Handle | UPC Code: 847983017171

Special Features

- Compatible with the ikan MS1, DS1 and EC1 Gimbals
- Adds enhanced control and maneuverability to hand held gimbal operation
- Works with most gimbals which include a 1/4"-20 & 3/8"-16 threaded mount on base
- Made of durable yet lightweight aluminum
- Built-in feet allow the Handle to securely set on a table top for calibration or stationary shooting
- Comfort Grip handles help reduce fatigue and loss of grip

Features you need, Prices you want.

Padded Grip Handles

The style of "handlebar" grip reduces fatigue and increases stability when in use.

Tabletop Feet

With the integrated tabletop feet, you can calibrate your MS1, DS1 or EC1 gimbal hands-free and provide a resting spot for it when not in use.

Inverted Usage

The DGH's unique design allows you to operate your gimbal either in an over-handed or under-handed position. *(Note: Underhanded operation requires a gimbal that can properly operate when inverted.)*

Gimbal Compatibility

Although the DGH is specifically designed for Ikan's MS1, DS1 or EC1 it is compatible with most gimbals that feature a 1/4"-20 mounting point on the gimbal's base handle.
