

H2541 Mounting *(for Sony PVM 2541 and PVMA250)*

Mounting the H2541 hood is facilitated by affixing the 3 enclosed adhesive Velcro strips to the top and both sides of the monitor. Hood may be used as a 3 sided visor or you may add the bottom panel for optimum glare free viewing. Bottom panel is held in position by engaging the Velcro fasteners at each edge. The rain cape will attach to the back perimeter of the hood using the Velcro binding tape sewn into each part.
